# Medical Products

## Tele-bags

Tele-bags are designed to carry portable Telemetry Heart Monitors.

They are made with patient comfort and practicality in mind. The bag hangs around the patient's neck comfortably.

## Enabling Mittens

Enabling Mittens have been carefully designed to aid the prevention of confused patients attempting to pull out Naso-gastric tubing and IV lines.

They are disposable, for single patient use, and can be used on either hand.

## Pump Pouches

Pump Pouches are specifically designed to hold the Niki syringe pump driver.

They have a long strap so patients are able to mobilise with them over their shoulder or head, or alternatively they can be tied to the bedside rail.

## Sam Pouches

Sam Pouches are larger bags with straps that can attach to the side rail or the end of the patient's bed.

They are great to use throughout the hospital for a wide variety of uses.

The Sam Pouch is our most versatile, larger pouch option.

## Why buy from us?

We are a New Zealand owned and operated business that has been designing and producing products for over 20 years.

Grace, the founder and product designer, has a medical background, having worked in hospitals and resthomes for over 20 years.

Grace has worked closely with infection control on these products and they have all gone through a new product evaluation committee.

We are Palmerston North based and prioritise getting the product to you fast.
